

# PETROL-GEL

Petrol-Gel is probably the number one sanitary lubricant used by the dairy industry today. The popularity of the technical white grease, has expanded to all areas of food manufacturing... to such industries as meat and poultry packing manufacturers, fruit and juice canners, vegetable canners, and many more.

Petrol-Gel is the purest of lubricants, made with an odourless, tasteless high viscosity index paraffinic base oil. Petrol-Gel is compounded with appropriate food grade additives to meet the performance demands for all recommended applications.

Each ingredient used in this oil is approved by the FDA under Section 121.2553, Lubricants with incidental food contact, subpart F, food additive amendment to the Federal Food, Drug and Cosmetics Act. The amendment requires that the lubricant must not contaminate processed food to an extent greater than 10ppm. Approved by the USDA as Class AA lubricant for use where incidental food contact may occur.

## **ABSOLUTELY TASTELESS AND ODORLESS**

**USES:** Sanitary Fitting, Stainless Steel Valves, Homogenizer Pistons, Filling Machine Pistons, Centrifugal Pumps, Guides and Slides Mechanisms, Continuous Direct Draw Ice Cream Freezers, Gaskets and Seals.

**A SANITARY LUBRICANT  
DEVELOPED PRIMARILY FOR THE  
FOOD INDUSTRY**
