

M- Series Water saver Nozzles

Strahman Water Saver Nozzles

The M Series Nozzle releases only the amount of water you need. Squeeze the lever arm lightly and the nozzles provide a soft spray. Full pressure on the lever will produce a strong straight stream. This convenient control of the water ensures better cleaning with less effort. The nozzle automatically shuts off the moment the lever is released, eliminating water waste. With its bronze internal construction (not aluminum), the M Series ensures long-lasting performance.
