

# HAND-WASH SINKS

Model 505L

Columbia Products is a leading manufacturer of stainless steel hand wash sinks. We have been providing high quality sinks to the food processing and commercial industries since 1949. We specialize in hands-free operation with a focus on sanitation to prevent cross contamination that can cause food-borne illness. Years of manufacturing and engineering knowledge have made Columbia the standard in the food processing industry.

- **Issue:** Cross-contamination occurs due to transfer of dirt and germs on common access equipment such as sinks and faucet handles. The spread of germs can lead to significant manufacturing and processing delays, as well as employee absences.
- **Application:** Use hands-free wash-stations to activate water usage without touching a faucet to help contain possible contaminants.
- **Recommendation:** We offer a variety of hands-free sinks you can operate to avoid cross-contamination. Manual faucets are also available for industrial use.
