Master Distributor for Ampco Pumps

PUMP REMANUFACTURING PROGRAM

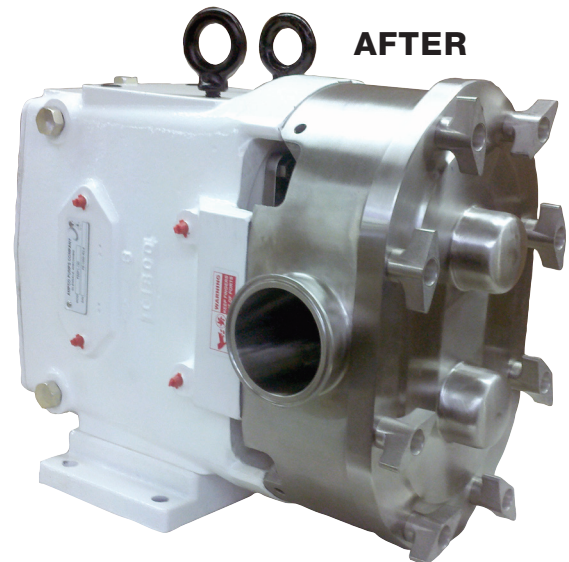

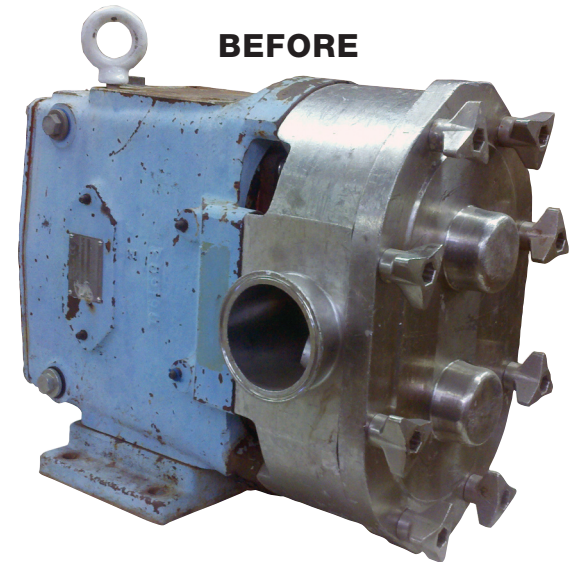

The Ampco Pumps Company remanufacturing program has earned an excellent reputation since it was introduced in 2010. Remanufacturing a used pump is a significantly lower-cost alternative to purchasing a new replacement pump. This program will restore your old Ampco, Wright, Waukesha Universal I and II Series style pumps to their original performance and efficiency. Ampco can convert your ZP2 into a CIP able ZP3 with front loading seals. All completely remanufactured pumps are performance tested and include a full one year factory warranty.

ADVANTAGES OF AMPCO'S REMANUFACTURING PROGRAM

- Reconditioning up to four times, depending on wear
- All assembled pumps are performance tested
- Helical Gears
- Quick turnaround
- Shafts up-graded to 17.4 ph
- Stainless steel bearing retainers
- Powder coated finish on gear case
- Options available to improve pump wear

For more information, contact us at 1-800-361-5361

COMPLETE REMANUFACTURING

- Machine housing and cover to accommodate oversized rotors (up to 4 times)
- Recondition gear case including powder coating finish
- Replace all other parts including rotors, shafts, bearings, bearing retainers, gears, jam nuts/rotor nuts, seals and elastomers
- Performance test before shipment
- One-year factory warranty
- Average savings of 30% over new pump pricing
- Possible adders: We will notify you if the housing, cover, gear case or ferrules are not salvageable or if the pump requires excessive clean up
- Additional options are available, contact Harco for details
