

CHEESE WRAPS

40# Wilson Wraps

Cheese plants have traditionally used fabric wraps to line various types of cheese hoops in the press operations.

- Some operators prefer the strength of fabric, together with the economy of washing and reusing wraps.
- Cotton and nylon are used as both disposable and non-disposable cloths.
- Bleached and/or hemmed are available according to preference.
- Disposable wrappers are becoming increasingly popular because of their hygienic qualities, which discourage mold. They also save time and labor.

Cheese Style: #40 Wilson

Ply Ban

Size of Cheese: 14-3/16" x 11-3/16" x 6-1/2".
