COLOR-CODED METAL DETECTABLE PRODUCTS FOR CLEANING & MATERIAL HANDLING

Hygiene | Sanitation | Safety

Finally, combining the benefits of color-coded and metal detectable products in one - these high impact polypropylene tools have the ability to be detected by most metal detection machines used in the food processing industry. As part of a comprehensive line of hygienic material handling tools, these metal detectable products are made from a specially formulated FDA-compliant material with a semi-ferrous additive in this product allows for use in conjunction with a metal detectable system. Helps to prevent damage to delicate and expensive equipment.

These color-coded metal detectable plastic products are available in many colors to support food safety material handling, cleaning, HACCP and hygienic sanitary programs that are aimed at preventing cross-contamination. The sturdy, seamless one-piece polypropylene construction ensures there are no seams or cracks to harbor bacteria.

Metal detectable color-coded tools provide the ultimate step in quality assurance and safety for the food processing industry. Metal detectable plastic is a lightweight and less costly alternative to stainless steel. Please call for more information on our Metal Detectable products.

METAL & X-RAY DETECTABLE PENS, MARKERS AND REFILLS

Detectamet's range of metal detectable pens and markers are manufactured from a specially formulated food contact approved polymer that combines metal and X-ray detectability. The pens bodies are flexible and shatterproof making them ideal for use in food processing plants to help achieve safety and compliance.

Detectamet's pens are able to write on a variety of surfaces, including glass, metals, food, whiteboards and most plastics as well as card and paper. Detectamet can even provide pens with the ability to write through grease and in cold stores.

Metal Detectable Pens & Markers - Features & Capabilities

Take a look at our key to learn more about these pens and their capabilities.

General

Detectamet's pens are ergonomically designed for long periods of use.

Chilled

Our gel pen works in low temperatures, ideal for use in chilled areas.

Freezing

Our cryo pens can write in extremely low temperatures down to -20°C (-4°F) in areas such as cold stores.

Wet/Damp

Our specially developed Detectamet Cryo Pens won't smear when used on damp surfaces.

Powder Environments

Our Cryo Pens will continue to write even in powdery environments. This is most useful in mills and bakeries.

Enclosed Environments

For tight environments you need a pen that can write at unusual angles - our cryo pens are perfect for this.

Wipeable

Our whiteboard pens write clearly whilst being easy to wipe off.

Meat/Food

Our meat/food ink can mark your product and is also safe to consume. Marking meat and food is essential for tracking produce.

Packaging

We have a wide range of marker pens for clearly visible, accurate marking to suit all your requirements.

Labels & Tags

Our fine marker allows you to write clearly on a waxy surface permanently.

Touch Screen

Our range of styluses are suitable for passive and capacitive touch screens.

One-Piece Pens

Our most BRGS compliant pen style, conforming to 'Global standards for food safety' section 4.9.6.2.

Split Ring

Many of our pens can be attached to a split ring, safety chain or lanyard.

Refillable

Our range of styluses are suitable for passive and capacitive touch screens.

Metal Detectable Cylinder Brush

Fully metal detectable block and bristles make this cylindrical brush suitable for cleaning meat mincers and different pipes and tubes. All components made with EU/FDA Food safe approved materials.

Soft Bristles 13.78" x 3.15" dia.

Blue

510-T117-A45

Medium Bristles 13.78" x 3.15" dia.

Blue

510-T117-A46

Metal Detectable Cylinder Brush for Long Handle

This fully metal detectable cylinder brush fits onto our Detectable Handle (526-P01-A43) giving you great reach to clean vats and tanks. All components made with EU/FDA Food safe approved materials.

Head Size - 3.27" x 2.95" dia.

Blue

510-T470-A221

Metal Detectable Wall/Floor Scrub Brushes

Full metal detectable block and bristles for scrubbing floor and walls in areas where hygiene is a priority. And is suitable for use with our detectable handles.

SMALL - Medium Bristles 11.02" x 2.36" x 2.75"

Blue

510-T116-A46

LARGE - Medium Bristles 18.11" x 2.56" x 3.54"

Blue

510-T115-A46

Metal Detectable Banister Hand Brushes

These fully metal detectable & X-ray visible Banister Hand Brushes are suitable for cleaning equipment and hard to reach areas. Made with EU/FDA Food safe approved materials. Created to be durable, resistant, easy to clean, and ergonomic.

Soft Bristles 14.57" x 1.57" x 2"

Blue
3647336

Short Handle - Stiff Bristles 12.20" x 1.57" x 1.77"

Metal Detectable Cutting/Chopping Board

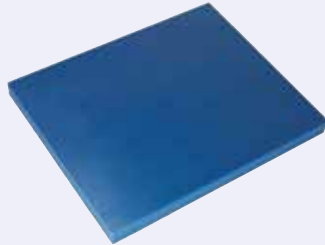

This metal detectable chopping / machining board is available in two sizes and has been approved for food contact making it ideal for use in food factories and processing environments. Excellent wear/abrasion resistance. Detectable UHMWPE - 'Detectathene' - FDA & EU compliant for food contact. Suitable for low temperature environments -200°C (-328°F) up to 80°C (176°F).

24" x 18" x 0.40"

Metal Detectable Scouring/Scrub Pads

Ideal for use in the food industry, these Metal Detectable Scouring/Scrub Pads contain iron particles which can be detected in conventional end of line metal detectors. They are durable long lasting abrasive scrub pads made to withstand harsh food processing environments. Great for ovens, kettles, fryers, equipment, belts, and more!

Scouring/Scrub Pad - 8.85" x 5.9" x 0.35"

Blue
132-S972-P01

Metal Detectable Gasket Scrapers

These heavy-duty metal detectable gasket scrapers are perfect for gasket scraping, removal of rust or grease from hard to reach areas. Stainless steel blades for extra strength and durability with fully detectable plastic handle.

Metal Detectable Mixing Paddle Scraper

This one-piece fully metal detectable & X-ray visible paddle is available in five colours, ensuring cross contamination is avoided. Manufactured from EU & FDA food contact approved detectable polymer.

52" OAL, Blade 5.90"W - without holes

Light Gray	Red	Blue	Green
531-S856-A51	531-S853-A51	531-S851-A51	531-S854-A51

Metal Detectable Mixing Paddle

This large one-piece paddle is specifically designed for the food processing industry, this detectable paddle has holes, making it suitable for stirring both high and low viscosity liquids. Manufactured from EU & FDA food contact approved detectable polymer.

47.25" OAL, Blade 9.75"H x 6.25"W - with holes

Red	Yellow	Blue	Green
531-S249-A256	531-S249-A258	531-S249-A50	531-S249-A257

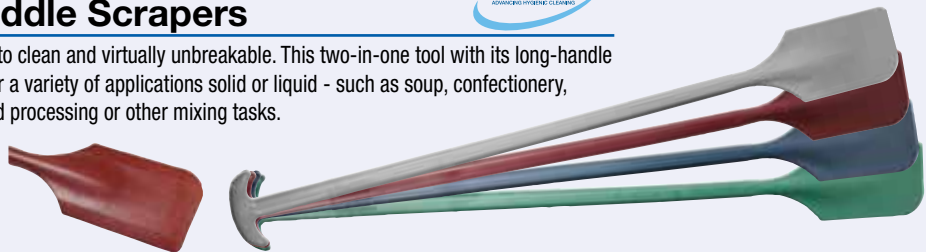

Metal Detectable Mixing Paddle Scrapers

These one-piece metal detectable mixing paddles are easy to clean and virtually unbreakable. This two-in-one tool with its long-handle design makes it easy for both mixing and scraping. Great for a variety of applications solid or liquid - such as soup, confectionery, dough, and sauce manufacturing as well as many other food processing or other mixing tasks.

Paddle Scraper 13"D x 6"W x 52"OAL

Light Gray	Red	Blue	Green
6777MD5	6777MD4	6777MD3	6777MD2

Metal Detectable Hand Scoops

These metal detectable scoops are great for material handling in areas of high sensitivity. Their tough construction makes these one-piece scoops ideal for a variety of applications. Features a convenient hook for hanging.

32 oz. Scoop - 5" W x 11 1/2" L x 2 3/4" D

Light Gray	Red	Blue	Green
6400MD5	6400MD4	6400MD3	6400MD2

Metal Detectable Stackable Scooping Jugs

These Metal Detectable lightweight, durable large capacity scoops feature pint and mL internal graduations for efficient measuring. Made from EU and FDA food contact approved detectable polymer. Stackable for easy storage and transport.

2 L/3.5 Pint Large Scoop - 4" W x 6.75" L x 6.75" H

Light Gray	Red	Yellow	Blue	Green	Black	Pink	Orange	Purple
364-7387	364-7380	364-7381	364-7165	364-7382	364-7383	364-7376	364-7384	364-7385

Metal Detectable Stackable Pouring Jugs

These large Pouring Jugs are stackable for easy storage and transport with internal graduations in pints, ounces, and mL. Made from EU and FDA food contact approved detectable polymer. Come in two sizes and nine different colours.

1L/2 Pints Small Scoop - 4.75" D x 5" H

Metal Detectable Shovels

This one-piece metal detectable and x-ray visible shovel is available with two handle lengths, making it suitable for a wide range of food processing jobs. Manufactured from EU & FDA food contact approved detectable polymer. Shovel size is 12.87" x 10.66" x 1.96".

Small Handle - 21.65" L

Light Gray	Red	Yellow	Blue	Green

Metal Detectable Stackable Storage Tray with Lid

This metal detectable & X-ray visible stackable storage container with lid is suitable for safely transporting and storing products and ingredients. Manufactured from EU & FDA food contact approved detectable polymer and X-ray inspection systems. Complete with a lid and stackable design. At 15.75" wide by 22.75" long and only 4.75" deep, these are perfectly sized for standard food factory conveyor systems.

Stackable Storage Tray with Lid

Metal Detectable Reusable Aprons

The Aprons are metal and X-ray detectable designed for repeated use. They are ideal for use in the meat, fish and dairy processing industries where work areas are subject to high water usage and soiling. Also resist animal oils and fats, and can cope with strong detergents and acids and alkaline liquids making them well suited for use in a challenging food production environment.

Rubber Knobby Mat™

One of our most popular mats is now available in metal detectable material. Our metal detectable mats are differentiated with a third die-cut hole. Knobby surface of both sides will allow for circulation of air or liquid. Mat with the "X" helps prevent cross-contamination - use the solid colored side for product contact. Formulated with FDA approved materials. Features three 3/4" reinforced die-cut hanging holes for use with stainless steel mat hanger (#141-2200).

Mat with "X" and 3/4" Hanging Holes

141-2080 - White with No "X"

141-2081 - Black with No "X"

Also available in
Non-Metal Detectable.

Dual Color Rubber Knobby Mat™

The popular dual color knobby mat is now available in metal detectable material. Metal detectable mats are differentiated with a third die-cut hole. One side of the mat is solid black, while the other is a solid color to easily identify product and non-product surfaces. Formulated with FDA approved materials. Features three 3/4" reinforced die-cut hanging holes for use with stainless steel mat hanger (#141-2200). 21" x 27".

Also available in
Non-Metal Detectable.

DETECTOMERS® METAL DETECTABLE/X-RAY INSPECTABLE GASKETS

X-ray and metal detection systems provide confidence to food, dairy and pharmaceutical manufacturers by insuring product safety and integrity as outlined by the Food Safety Modernization Act. Developing an effective inspection program to detect contaminants and to monitor the consistency and quality of product helps avoid product waste, recalls, costly down time and customer complaints.

Metal Detectable/X-ray Inspectable Tri-Clamp® Type I Gaskets

Detectomers® are available in Metal Detectable/X-ray Inspectable materials combined to provide you with the Ultimate Detection Product!

Detectomer® BUNA Bevel Seat Gaskets

Bevel Seat gaskets are designed for use in sanitary piping systems in the Food, Dairy, and Beverage industries. The new Bevel Seat gasket is a welcomed addition to the Detectomer® product line of metal detectable/x-ray inspectable gaskets and accessories. Available in Buna and 1" - 4", this gasket is the perfect choice for processes where Detectomer® products are needed.

DE - DETECTABLE ELASTOMERS Replacement Pump & Valve Parts

For The Sanitary Processing Industries - TriClover & APV

A common problem with moving pump parts is excessive wear and tear. When rubber breaks off from a valve stem, rotor or gasket, it will migrate through your system and end up hidden in your final product. Locating lost rubber parts can be an expensive, time consuming and inconclusive process. Not locating lost rubber can be even costlier.

A simple solution is by manufacturing standard pump parts with **DE—Detectable Elastomers**—lost rubber material can now be located quickly and efficiently with an in-line metal detector allowing contaminated product to be instantly rejected. DE parts help avoid costly down time, product waste and recall, insuring product integrity.

All replacement parts, DE valve stems, rotors, gaskets and o-rings are designed to match all OEM specs with the added bonus of a metal detectable elastomer.

DE—Detectable Elastomers is available in:

VALVE STEMS – High quality 316L SS steel core with detectable rubber bonded to the metal.

RUBBER ROTORS – New or refurbished cast steel cores and steel or aluminum bodies with DE rubber bonded to the metal.

GASKETS & O-RINGS – DE Tri-Clamp® gaskets and o-rings for all applications.

For more information on these replacement parts and additional offerings to this new product line call **1-800-361-5361** or email us at sales@harco.on.ca.

Product Line Card

Supply House to the Processing Industries Since 1964

Harco partners with leading manufacturers in the industry to bring you an innovative range of sanitary and hygienic processing equipment and supplies. With experience in design, manufacturing and support, our partners are selected for their quality, reliability, and advanced products.
