NEW PRODUCTS

VIKAN® UST Tank Brush

The Vikan UST Tank Brush combines patented Ultra Safe Technology (UST) with a seamless, easy-to-clean design, offering exceptional bristle security, durability, and hygiene. Engineered for optimal cleaning, it features angled bristles, wide drainage holes to prevent water pooling, and a compact, lightweight build ideal for tanks, mixers, blenders, silos, and other challenging areas. Perfect for color-coded cleaning systems, this brush enhances safety, efficiency, and performance, making it a reliable solution for dairies, breweries, wineries, and food production facilities. Its hygienic design minimizes contamination risks, ensuring superior cleaning for complex equipment and large food-contact surfaces.

UST Tank Brush, 7.5"L x 6.7"W x 4.1"H, Stiff

VIKAN® HyGo Mobile Cleaning Station

The Vikan HyGo is a versatile mobile cleaning station designed for hygiene, efficiency, and maneuverability. Its narrow frame and 360-degree wheels navigate tight spaces, while customizable tool brackets hold up to 12 tools. Lockable rear castors provide stability, and durable trays support up to 26 lbs. (upper) and 44 lbs. (lower). Easy to disassemble and clean, HyGo streamlines cleaning while saving time and space.

30.7"L x 20.9"W x 40.6"H

Stainless Steel Hand Dough Cutter/Scraper

The Vikan Dough Cutter/Scraper is a baker's best companion, efficiently cutting and handling dough, removing sticky messes, and tackling burnt-on food on tables and cutting boards. Its flexible 0.5 mm stainless-steel blade cuts various doughs, cooked pastries, and soft foods, with rounded edges for safety. The durable polypropylene grip and ergonomic finger rest ensure comfortable use. A drop-shaped hanging hole allows easy storage.

Natural Aluminum Handle with Colour-Coded Tip and Hang Cap

The 3/4" acme thread handle fits most standard broom heads and is made from durable natural aluminum, suitable for use with caustic chemicals. Designed for Sparta push brooms, sweeps, squeegees, and floor scrubs, it features a color-coded tip and hang cap to prevent contamination. The hanging cap keeps the handle organized, and the one-inch diameter ensures a comfortable grip.

Why Colour-Coded?

We offer a diverse and extensive collection of colour-coded products, laying the foundation for a solid food safety program. Our colour-coded offering can help minimize the risk of cross-contamination. Achieving a higher degree of food safety.

A complete well-planned colour-coded system helps promote organization and efficient work flow. Designating critical control areas and zones helps your sanitation program by ensuring that the tools stay in the work areas in which they are meant to be used, doing the jobs they are meant to do. A simple and effective way to prevent cross-contamination. Colour-coded systems also help avoid bacterial and allergen migration within a facility, allowing you to maintain a safe food processing facility.

Selecting The Proper Brush

The Carlisle line of Sparta® brushes and cleaning tools is specifically designed for the foodservice industry. When designing a product, special consideration is given to preventing the possible transfer of bacteria to maintain superior foodservice hygiene. Cross-contamination from foods and personal hygiene of foodservice personnel are increasingly important under the HACCP guidelines. We believe that the Sparta line represents your very best choice for efficiency, service and durability in foodservice sanitation, maintenance and food preparation.

Brushes and cleaning tools have to be very specialized in order to meet all of the unique requirements of the foodservice industry. Brushes and cleaning tools are shaped and sized for specialized foods, pipes, fittings and equipment used exclusively in the foodservice environment. Proper bristle selection is also extremely important. Longer bristles offer greater flexibility when compared to the same material in a shorter trim. The key to efficiency is maximum bristle tip contact to surface and the proper type of bristle for the surface to be cleaned or prepped. Proper selection is extremely important for making the cleaning and prepping process as easy and efficient as possible.

When choosing brushes, most fall into one of three basic categories:

1. Circular "tube cleaning" type brushes – Tube cleaning brushes are designed to fit inside of drains, valves, tubes and other types of fittings. Tube cleaning brushes are specified by diameter across bristle area. The diameter of the brush should be exactly the same as the opening of the tube or fitting to be cleaned. If the opening is larger than the brush diameter, the bristle tips will not contact the walls of the surface to be cleaned. A loose fitting brush means that multiple passes will be required or that the surface may not be cleaned properly. A fit that is too tight reduces cleaning efficiency as well as possibly damaging bristles or resulting in a brush becoming stuck in an opening. The length of handles for tube brushes should be long enough to reach the entire length of tube or fitting to be cleaned. Tube brushes are often bent or curved to specific shapes for cleaning the outside of tubes, and fittings.

2. Flat "scrub" type brushes – Brushes in this category are for cleaning flat, curved or open surfaces. Many of our scrub brushes have various "trim" angles to help keep bristle tips in contact with surfaces during the cleaning or food prepping process. Sparta brushes are ergonomically designed to provide superior comfort and control. Scrub brushes come in different handle shapes and lengths for a safe and convenient reach to surfaces.

3. "Pastry and basting" brushes – Pastry and basting brushes are designed with densely packed, fine bristles for greater "loading" of brush with melted butter, vegetable oils, sauces, glazes or other fluids used for food preparation. The greater the mass of bristles and the greater the bristle tip surface area, the greater the amount of fluids that can be spread across food surfaces. Sparta pastry and basting brushes have high bristle count for greater spreading and to eliminate bacteria harboring voids common on most other brands of pastry or basting brushes.

As health department standards continue to increase, brushes and cleaning tools will play an increasingly important role in meeting regulations and reducing maintenance costs. The correct brush or tool designed for the proper job will ensure greater efficiency and reduce health risks in the foodservice environment. Carlisle offers you the most comprehensive line of brushes and tools available to meet your very special requirements. We stock a wide range of products to meet customer demands and can provide custom designed products to serve solutions for even more specific needs. Carlisle is your source for all foodservice cleaning and food preparation products.

Here at Harco we will help you choose the proper brush for your specific job. Call our sales desk today for more information, and a free quote on Carlisle products.

VIKAN'S HYGIENIC THREAD, OR EURO THREAD, PROVIDES THE FOLLOWING BENEFITS:

- Threads are easier to clean
- Seals with thread on thread contact to minimize entrance of foreign material
- Less propensity for loosening of the tool threads during usage, often referred to as "walk-off"

Stainless Steel Euro-Thread Handles

Ergonomic and durable stainless steel handle can withstand demanding use, is chemical resistant and FDA compliant making it suitable for most applications in the food processing industry. Long colored hygienic sleeve increases durability and makes the handle ergonomically friendly, easy-to-use and promotes color-coding programs. Hygienically designed Euro-thread is easy to clean and allows for pairing with any Vikan brand broom, scrub, squeegee, or other hygienically designed Euro-thread Vikan products.

59" Stainless Steel Handle with Sleeve

White	Red	Yellow	Blue	Green
29395	29394	29396	29393	29392

Basic Aluminum Euro-Thread Handles

This basic aluminum handle is durable and suitable for most applications in the food processing industry. This standard aluminum handle is an important part of color-coding programs and can be used with all brooms, squeegees and scrapers. Color-coded hanging hole allows for easy storage. Hygienically designed Euro-thread prevents walk-off and is easy to clean.

Chute, Valve & Bottle Brush

FDA approved materials

BPA free

Slim handle and softer bristles enable careful cleaning of jars, bottles, and glasses. Heavy-duty, soak-proof brushes offer a dense fill of stiff bristles for greater cleaning efficiency and superior wear. Tough, but gentle bristles are firmly imbedded into the stem. Plastic handle with knurled grip offer better cleaning control.

Pipe & Valve Brush

Made from FDA-compliant materials.

Nine sizes to clean a variety of pipes, tubes and openings including valves, hoops, outlets, kettles, and urns. Polybutylene bristles are non-absorbent and keep their shape for longer bristle life. Polyester bristles maintain shape for superior crubbing and prolonged bristle vitality. Use with Carlisles' standard threaded handles (2939, 2958, and 2959), sold separately on page 2.

Fixed Head Double Foam Blade Bench Squeegee

Made from FDA-compliant materials.

This fixed head bench squeegee with white foam blade is a small bench squeegee used for drying surfaces after a sanitizing process or for pushing both water and food from preparation surfaces. A double blade foam rubber squeegee with replaceable cassette (77715). The most effective squeegee for removing large amounts of liquid or debris from areas with a smooth or tiled surface quickly.

10" Blade - Bench Squeegee with 6.5" mini handle

Single Blade Ultra Hygiene Squeegee

Autoclavable at temperatures up to 212°F/100°C.
Made from FDA-compliant materials.

The ultra-hygienic fully molded single-blade squeegee is ideal for use in areas requiring the highest level of hygiene. Improved design features smooth and rounded surfaces which provide better hygiene and easier cleaning. The elongated body reduces wear and tear on the ends of the flexible rubber blade to enhance durability and efficiency. A splash guard helps prevent liquid from splashing onto the dried surfaces. Requires Euro-thread handle, sold separately, see pages 2 & 3.

Double Blade Ultra Hygiene Squeegee

Autoclavable at temperatures up to 212°F/100°C.
Made from FDA-compliant materials.

The double-blade non-porous rubber design of this squeegee is effective in removing water from all types of floors and very efficient in large food production facilities. The cartridge system blades can be removed for easy cleaning and replaced when worn out, making the model a very economical hygienic option. Euro-thread handle, sold separately, see pages 2 & 3.

Angle Cut Broom

The angled design of this broom makes it easy to reach into narrow spaces between equipment when sweeping debris before the scrubbing action starts. It is particularly used for collecting large particles of dirt like meat and vegetables in a moist environment. 4.5" x 6"L extra-stiff polyester bristles. 11"W block. Requires Euro-thread handle, sold separately on pages 2 & 3.

Vikan
ADVANCED INDUSTRIAL CLEANING

Split Bristle Angle Head Broom

The split bristle angle head broom is designed to handle fine particles like dust, flour, and powdered sugar. The soft/split bristles gently sweep away these powders without leaving residues. The broom head, made of FDA-compliant materials, comes in six colors, making it a great addition to any color-coded food safety or sanitation plan. Requires Euro-thread handle, sold separately on pages 2 & 3.

Soft/Split Polyester Bristles

Upright Lobby Dustpan

This dustpan has an enlarged rear and side walls to allow it to hold more debris while its contact lip allows for easy and efficient sweeping. The outer front surface has a raised area to prevent debris from falling back out, making this a practical choice for cleaning up a large area quickly and with less strain on workers. FDA compliant. Total color dustpan and matching aluminum handle. Handle clip allows a broom to be attached during storage. See page 14 for Vikan's brooms (3103 / 3105) or page 25. (3104 / 3166).

Remco Scrub Pads

These scrub pads are made from polyester fibers with a high (coarse - brown), moderate (medium - blue) and light (fine - white) level of abrasiveness. Scrub pads may be used with pad holders and handles to clean stubborn messes in difficult to reach areas - Vikan Cleaning Pad Holder (5500x) or the Vikan Handheld Cleaning Pad Holder (5510x). All scrub pads measure 4.4" wide x 10" long.

Brown
5523

Brown-Coarse - This pad is tough on stubborn dirt and grime, especially on floors.

Blue
5524

Blue-Medium - This medium pad is great for cleaning stubborn dirt and grime on walls.

White
5525

White-Fine - This soft pad is gentle enough to clean stainless steel tanks and other sensitive surfaces.

Floor Drain Brush

Special female threaded handle accepts the floor drain brushes only to prevent cross contamination. Long lasting polypropylene bristles and plastic handle (sold separately) stand up to rugged use. "USE FOR FLOOR DRAIN ONLY" is prominently imprinted in English and Spanish on the plastic drain handle (sold separately) to prevent contact with food and serving utensils.

One-Piece Pipe Brush with Handle (new design)

One-piece construction and high-quality materials make Vikan's latest **Pipe Cleaning Brush** durable enough for repetitive tough cleaning. More bristles means this brush holds even more cleaning solution, making wet cleaning a breeze. The stiff bristles allow the brush to handle tougher cleaning jobs, whether it's for metal, nylon, PVC, or stainless steel pipes. The ergonomic designed handle is long enough that force can be easily applied, but not cumbersome. The lack of crevices, cracks, and mold lines eliminates the places bacteria can hide and makes it easy to clean. Industrial dishwasher or an autoclave safe.

Medium/Stiff Polyester Bristles - 3.1" Dia. - 16.9" L

White	Red	Yellow	Blue	Green	Black	Orange	Purple

Tube/Pipe/Valve Brush Heads

Autoclavable at temperatures up to 250°F/121°C.
Made from FDA-compliant materials.

This tube brush is tough enough to handle a variety of applications - food and pharmaceutical plants. Use in areas where a wider tube cleaning action is required or where the equipment has an end point that cannot be reached with a hand brush. Designed to clear debris in straight pipes or to clean large round tank outlets and drains. Requires a Vikan Euro-thread handle, sold separately on pages 2 & 3.

Hook Brush

The curved design of the hook brush makes cleaning between and around pipes easier. The hand grip utilizes a threaded recess on the end that allows another Vikan Euro threaded handle (sold separately on page 2) to be connected to the brush allowing comfortable cleaning of pipes in high or difficult to reach areas. The brush bristles are secured with noncorrosive stainless steel wires, helping increase longevity. All materials are FDA compliant.

Tube & Valve Brush With Stainless Steel Wire

These brushes are great for cleaning small pipes and very narrow spaces between machine parts. The bristles are attached to a helically wound stainless steel shaft, making it strong and chemically resistant. One-piece with a polypropylene hand grip. These products are made from FDA compliant raw materials, and are autoclave safe and dishwasher safe. See page 16 for Tube Brush with Flexible Handles.

Grout Brush

This grout brush is excellent for scrubbing in difficult to reach areas or areas where you only have limited space. You can turn the handle down so that it is parallel to the floor allowing the user to go down under equipment that is as low as 5 in. from the floor. The extra-stiff angle cut bristles are cut in an "arrow" shape to facilitate cleaning of grouts between tiles and crevices in general. The middle row of bristles are stiffer than the filament bundles on the sides. The new crevice scrub is mounted with thread adaptor that can be removed for easy cleaning of the whole product. The neck allows for 180° of rotation, great for cleaning under equipment, between equipment, getting into corners, cleaning the crevice between floors and walls, cleaning floors in toilets etc. Requires Vikan Euro-thread handle, sold separately on pages 2 & 3.

Extra-Stiff Bristles - 9.25" L x 1.5" W x 6.25" H

White	Red	Yellow	Blue	Green	Black
70405	70404	70406	70403	70402	70409

Compact Deck Scrub Brush

Clean around equipment and against walls with this HACCP-compliant color-coded deck/wall scrub. This scrub features angled bristles around the perimeter and a rounded, compact design for improved durability. Requires Vikan Euro-thread handle, sold separately on pages 2 & 3.

Stiff Polyester Bristles - 3" W x 8.86" L

White	Red	Yellow	Blue	Green	Black
70425	70424	70426	70423	70422	70429

Deck/Wall Scrub Brush

This floor scrubbing broom has a wide base and firm longer bristles that provide a deep clean that removes tough debris like stubborn food particles and sticky substances on all types of floor surfaces, epoxy coated, tiled, or cement and also around holes, or indentations in the floor. The easy movement and friction of the bristles means the user does not need to apply as much force to clean effectively. This 19" wide scrubbing broom is ideal for cleaning heavily soiled areas and covering a lot of ground in food production facilities such as meat processing plants, bakeries, canneries, and dairy plants. Requires Vikan Euro-thread handle, sold separately on pages 2 & 3.

Heavy-Duty Push Broom (Small and Large Particles)

This Heavy-Duty Push Broom has a heavier broom head to better maintain floor contact during sweeping. And has **densely packed stiff and soft bristles** for efficient sweeping of fine and large debris. Angled cut bristles prevent skipping during long pushes, while flared bristles reach into corners and wall junctions for a more thorough cleaning. Requires Vikan Euro-thread handle, sold separately on pages 2 & 3.

16.5" - Soft-Stiff Polyester Bristles

White	Red	Yellow	Blue	Green	Black

Nylon Hand Scraper with Threaded Handle

Suitable for loosening stubborn dirt like pastry, chocolate, burnt on food, etc. on smooth surfaces. The nylon blade is a good alternative to a stainless steel blade and can be used on sensitive surfaces to avoid scratches on equipment and sensitive conveyor belts. The hard blade can withstand hot surfaces when used at intervals of max. 2 minutes at a time. Can be used with any Vikan handle, see pages 2 & 3.

Small Scraper 4" W x 8" L

White	Red	Yellow	Blue	Green
40125	40124	40126	40123	40122

Stainless Steel Hand Scraper

This colour-coded stainless steel scraper is an excellent solution for removing stubborn debris from smooth surfaces. The scraper's beveled blade loosens dried pastry dough, starches, chocolate, and burnt food. The scraper is made entirely of FDA compliant materials, making it safe for food contact. Its ridged blade and ergonomic handle stand up to heavy and repeated use.

Nylon Floor Scraper (Threaded)

Our Nylon Floor Scraper is made of tough and food-safe nylon to promote food safety and durability. Floor scraper has a heavy-duty nylon blade that won't damage floors or machines. Its one-piece construction increases durability and means the scraper can not only clean up tough messes, it can do it for years to come. Can be used with any Vikan handle, see page 2-3.

Stainless Steel Table & Floor Scraper (Threaded)

NEW DESIGN

Our Stainless Steel Table/Floor Scraper features a shorter stainless steel blade for improved efficiency in removing stubborn debris in the food industry, as well as sticky messes like labels and chewing gum from floors in airports, supermarkets, and other environments. The hygienic design ensures easy cleaning, while the durable blade is built to last. It connects seamlessly with any Vikan handle for tackling tough, hard-to-reach areas. For compatible Vikan handles, see pages 2 and 3. (Replaces 2910x)

Food Hoe (Threaded)

Here is a unique durable nylon scraper/food hoe that is designed for both push and pull applications. It has the strength to move almost any type of product without breaking under pressure. Lightweight and long-lasting, its flat and arched edges make it the perfect tool for use on straight or curved surfaces. Can be used with any Vikan handle, see pages 2 & 3.

SHOVELS

Composed solely of FDA-compliant polypropylene, our shovels are hygienic and durable. They also have the added benefits of being total color, fully molded, and non-sparking, making them a top choice in the food industry. These tools are a cost-effective alternative to stainless steel and are ergonomically designed to reduce stress on the user's back. Durable and lightweight, plastic tools won't damage equipment like metal tools can. (See Metal Detectable Shovels on page 40.)

Plastic Shovel

Sturdy, one-piece shovel is constructed of rigid yet lightweight polypropylene. Perfect for hauling hefty loads. Smooth finish for easy clean-up. Deep bucket for extra capacity and an edged blade for easy scooping. Chemical and corrosion resistant. White, red, yellow, blue and green meet FDA and USDA requirements for food handling. Use black for non-food products.

Rubbermaid®

COMMERCIAL-GRADE CONSTRUCTION
Proprietary design plus a UV inhibitor ensures long life. Guaranteed to never fade, warp, crack, or crush.

Round Twist-On Dolly

FIVE RUGGED CASTERS - Help keep fully loaded BRUTES stable, even on rough and uneven floors, and swivel smoothly for easy maneuvering. **STRUCTURAL FOAM CONSTRUCTION** - Provides superior strength and durability, with a 250-pound load capacity. **NON-MARKING CASTERS** - Help protect floors, keeping public areas looking their best. **BLACK ONLY.** NSF approved for food contact.

25 Gallon Ingredient Bin

Provide effective color-coding for your ingredient bins. The clear sloped top provides easy at-a-glance identification of contents. Plastic base is color-coded and features 3" swivel casters for easy mobility. NSF approved for food contact.

25 Gal. Ingredient Bin 16.5" W x 30.5" L x 27.5" D

Clamp Gaskets

The standard 40MP-U BUNA clamp gasket just got better! Colours make it easy to code by area or date changed. Flexible, non-toxic compounds meet FDA specifications for direct contact with dairy products and edible oils, as well as 3-A, USDA and NSF criteria. Sold individually, but order in package quantities of 25 for more economical pricing.

METAL DETECTABLE PRODUCTS

Combines the benefits of colour-coded and metal detectable products into one. Made from FDA-compliant polypropylene resin, which can be easily identified by standard metal detection equipment.

Metal Detectable Flexi-Scraper

These metal detectable polypropylene scrapers are ideal for cutting dough, scraping batter or removing food particles from curved or flat surfaces. Slotted hole allows for easy hanging between uses. Approved for food contact.

Small Flexi-Scraper 4" W x 6.3" L

Light Gray	Red	Yellow	Blue	Green	Black	Pink	Orange	Purple

COLORED FEMALE CAPS

COLORED MALE CAPS

TOP DOG™ GARMENTS

The Top Dog™ Aprons are designed to support zoned color-coding programs. These total-color garments are durable and hygienic, provide protection to the wearer and are reusable. These garments are made from an ether-based polyurethane film, making them ideal for the food and beverage industry. They are chemical and abrasive resistant and will remain soft at any temperature. Machine washable and dryer-safe up to 180°F. Waterproof, latex-free, reusable and recyclable.

Top Dog™ Gowns

One-piece construction limits the potential for foreign body contamination and reduces harborage points for pathogens. Gowns are reversible and fit comfortably over clothes. These gowns feature full-length cuffed sleeves that offers full protection. The open back improves user comfort by reducing weight and providing ventilation.

Tingley Boot Saver® Shoe Covers

Prevent cross contamination with these high-quality, disposable shoe covers. Made from natural rubber latex Boot Saver® Shoe Covers are highly elastic and easily stretch over primary footwear. Resists a wide range of chemicals and fats, and provides a barrier from liquids and other contaminants. The textured outsole provides grip on both wet and dry surfaces, while the powder-free finish eliminates concerns about powder contamination. Sizes MED to 2XL to fit footwear sized 7 to 15.

Tingley Steplite® X Powered By Bekina® Pu Boots

100% waterproof and up to 30% lighter than most PVC and rubber knee boots, yet will last up to three times longer. These boots are made from high quality, chemical-resistant polyurethane (PU), and provide exceptional durability and comfort. A full-length sock liner, flexible upper, and removable contour insole delivers exceptional comfort, while the cleated, multi-purpose outsole provides excellent slip resistance on dry, wet, clean, and wet-contaminated surfaces. These seamless polyurethane construction boots are a 15" knee boot with 12" cutline for customizable boot height and are abrasion resistant for long life. Exceptional resistance to fats and oils. Self-insulating to keep feet warmer in the cold and cooler in the heat. Choose from plain toe or steel toe. Ideal Applications: Food Processing, Dairy, Meats (Beef, Chicken, and Pork), and Farm/Ag.

White Steel Toe - Meets ASTM F2413 M I/75 C/75

Dunlop® FoodPro Puroport® Safety Boots

A new generation of Puroport® boots designed for the Food Processing Industry. These polyurethane steel toe boots feature all the benefits of Puroport® technology, in addition to a MultiGrip outsole that can be used in a multitude of varying slip environments; mainly the (semi-) solid contaminated areas. Additionally the outsole of the MultiGrip is extra dirt-repellent. The FoodPro has been developed in such a way that it stays clean even longer. The surface of the shaft and the design of the boot are extra smooth, making the boot easier to clean. By ensuring that boots are easy to clean the risk of contamination can be brought to a minimum and that makes FoodPro more hygienic.

Rubber Knobby Mat™

Economic rubber mats designed for heavy wear and tear in almost any environment. Knobby surface on both sides allows circulation of air or liquid. Protects stainless steel parts or glassware from knocking against hard surfaces. Perfect for disassembled pump parts during repairs. Mat with black "X" helps prevent cross-contamination. Use the solid colored side for product contact and the side with the "X" as the bottom side. 21" x 27". All mats are formulated from FDA approved material.

Dual Colour Rubber Knobby Mat™

Take color-coding product contact and non-product surfaces to the ultimate level and reduce cross-contamination with this mat. One side of the mat is solid black while the other is solid colored making it easy to identify product and non-product surfaces. Knobby surface on both sides allows for circulation of air or liquid. Protect stainless steel parts or glassware from knocking against hard surfaces. Perfect for disassembled pump parts during repairs. Formulated of FDA approved materials and features ¾" reinforced die-cut holes in two corners for easy hanging on the stainless steel mat hanger (#141-2200).

21" x 27" Dual Colour Knobby Mat (solid black on one side)

Disinfectant Mat

Stop contamination at the door with a sanitizing footbath that cleans and sanitizes. Heavyduty rubber fingers clean shoe soles while solution sanitizes them. This unique double-action helps keep contamination from reaching food processing areas. Over 90% of the food plant professionals we surveyed said footbaths are Very Important or Somewhat Important. They are recommended at entrances to all food processing areas. Mat measures 32"x 39"x 2" deep.

4" High Temperature Scraper

This high-temperature large hand scraper is great for scraping hot cooking surfaces, such as griddles. It has no seams or cracks, which helps prevent bacterial growth. This blade is a good alternative to a stainless steel blade and can be used on sensitive surfaces to avoid scratching equipment or conveyor belts. For use in temperatures up to 410°F. See pg. 24 for more scrapers.
