Three buckets — one hygienic design

If you're not yet using Vikan buckets, there's never been a better time to start. Optimised sizes, hygienic design, Vikan quality and, now, a re-designed 12 litre size make these hygienic food handling and cleaning tools ideal for any food or beverage application.

6 Litre Bucket

Perfect for storing, moving and pouring smaller amounts of wet or dry ingredients. Also great for various cleaning applications.

12 Litre Bucket

A trusted workhorse for food handling and cleaning, now with a new and improved design.

What's new!

- Stackable
- Snap-on lid
- Sloped backside
- Hygienic drainage hole
- Easier-to-read measures
- Still compatible with wall brackets

20 Litre Bucket

Mix, store and transport larger-volume ingredients in this big, durable bucket. Doubles as a roomy cleaning and soaking tub for brushes, scoops and more.

Why Vikan buckets?

Vikan buckets are designed and manufactured to safeguard the integrity of your products, facilitate productivity and workplace safety, and pay for themselves many times over through superior quality and durability.

Safeguard the integrity of your products

As anyone in the food and beverage industry knows, product integrity is vital to food safety, customer satisfaction and business success. Thanks to hygienic design, colour coding, unmatched quality and compliance with all applicable EU and FDA standards, our buckets help you safeguard your integrity and good name.

Facilitate productivity and workplace safety

Your business depends on productive, safe and healthy workers. Your workers can depend on Vikan to make their jobs easier to do quickly, safely and in line with regulations. Ergonomics, usability, convenience and quality – all designed to bring out the best in workers every day.

Make sure your investment really pays off

The longer you're able to use a cleaning or food handling tool, the more your investment pays off. Premium-quality, highly durable materials and precision manufacturing enable Vikan buckets and other tools to keep on performing, delivering a very high return on investment through long-lasting performance.

Stackability

Easily stack two buckets on top of each other for space-saving storage

Snap-on lid

Snap the lid closed for added security, just like on the 6 and 20 Litre Buckets

Easy-read measures

Measure more accurately with easy-read litre, UK gallon and US gallon markings

The
12 Litre Bucket
up close

Sloped backside

Stir, mix and empty with a hand scoop faster and more easily than ever

Drainage hole

Prevent water accumulation during storage for improved hygiene

Wall bracket compatibility

Use existing wall brackets (16200) for the bucket and lid

Buckets and scoops, working together

The Vikan Round Bowl Scoop and Hand Scoop are ideal companions for your 6, 12 or 20 Litre Vikan Bucket. All scoops feature a hook for hanging the scoop inside or outside your bucket, along with recent usability and hygienic improvements.

Round Bowl Scoop

A hygienically designed scoop (1 and 2 litres)
for handling liquid ingredients

Dual spouts

Pour contents easily
whether you're left-
or right-handed

Easy-read measures

Measure more accurately
with easy-read litre and
UK and US fluid ounce
markings

Hanging hole

Store on Vikan wall
brackets with hygienic
drop-shaped hanging
hole

Hanging hook

Save time and hassle
by storing the scoop
inside or outside your
Vikan bucket

Hand Scoop

An advanced scoop (0.5, 1 and 2 litres)
for handling wet and dry ingredients

Tight-seal lip

Empty containers and
scoop ingredients
more thoroughly and
easily

Solid transition

Scoop with no
flexing and no risk of
contaminant build-up

Hanging hole

Store on Vikan
wall brackets with
hygienic drop-shaped
hanging hole

Hanging hook

Save time and hassle
by storing the scoop
inside or outside your
Vikan bucket

Round Bowl Scoop (1 Ltr.) - 5681x

Round Bowl Scoop (2 Ltr.) - 5682x

Wall bracket - 16200
Fits both 6, 12 and 20 Litre
Bucket

This Bucket Means Business

Multi-purpose functionality, hygienic design and unmatched durability make the 20 Litre Bucket a smart investment for any operation.

A problem-solver, however you use it

When you scale up a bucket to hold 20 litres of food and beverage ingredients, the bucket becomes more than just a bucket. With its hygienic design and premium-quality, durable materials, the Vikan 20 Litre Bucket is a multi-purpose powerhouse you'll find yourself using everywhere.

The quality and durability you expect

Like all Vikan products, the 20 Litre Bucket is made from premium-quality, highly durable materials that are all approved for use in the food and beverages industry. That means:

- Long-lasting performance
- No need to replace frequently – save money
- Higher quality for greater compliance certainty
- Less wear and tear
- Less risk of foreign bodies (plastic fragments)

Mix with speed and ease

The 20 Litre Bucket is an ideal "mixing station", where you can mix ingredients stored in smaller Vikan buckets or in multiple 20 Litre Buckets.

The bucket is perfect for solid or liquid ingredients, and its optimised size and shape make it large enough to meet all your mixing needs, but small enough for safe lifting and transport. Features like the bottom handle and a rounded rim and lip also facilitate ergonomic, no-spill lifting and pouring. And durable bevelled measurements inside help you measure more accurately.

Developed on the principles of hygienic design, the 20 Litre Bucket is easy to clean and helps you comply with hygiene and food safety regulations however you use it.

Store like never before

A 20-litre capacity makes the 20 Litre Bucket a very useful storage solution for liquid or solid ingredients and mixtures. Add in a stackable design and portability, and you get storage that can save space and time.

As space is a challenge in most production facilities, we made the 20 Litre Bucket stackable. Stack two buckets on top of each other, and effectively double the amount of ingredients you can store per square metre of storage space.

Handles and an optimised size make the 20 Litre Bucket a conveniently portable storage solution, while a snap-on lid and hygienic design features facilitate compliance with food safety standards.

Food safety and hygienic design

In the food and beverages industry, companies that don't meet food safety and quality standards soon find themselves out of business.

That's why we developed the 20 Litre Bucket in line with hygienic design principles – with features such as drainage holes to prevent liquid accumulation and easy-to-clean rounded angles inside. And it's why our products comply with all relevant EU and FDA standards for food contact.

What is hygienic design?

- Easy to clean and dry
- Durable and well made
- Smooth surface finish
- No acute internal angles
- Food-safe materials
- Fully tested and documented

Move more, more easily

The 20 Litre Bucket is made to move, either by yourself or with a colleague using the ergonomically designed side handles. When carrying lighter loads, use the comfortable over-moulded grip on the steel handle. When moving heavier loads, team up with a colleague and use the sturdy side handles.

The bucket's large size lets you move more in fewer trips, saving time, and its ergonomic design makes pouring and cleaning easier, with less risk of spills or strain. The bucket is available in 5 colours to facilitate HACCP compliance with regard to segregation of use.

Clean safely and effectively

In addition to mixing, storing and transporting food and beverage ingredients, the 20 Litre Bucket makes an ideal cleaning and disinfection station for all sorts of food-related tools and utensils.

It's the perfect size for cleaning most items, and its wide top facilitates access and manoeuvring while cleaning. The large size also provides plenty of room for disinfecting your tools after cleaning. And it's easy to move around as needed.

Our family of hygienic design buckets
