

Product selection guide

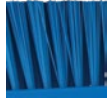

Vikan brooms & scrubs

Bristle options

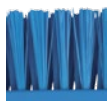

■ **Soft** — Bristles are longer and thinner than other types; ideal for sweeping dry, fine particles like flour and sugar

■ **Medium** — Suitable for wet and dry applications; great for sweeping larger food particles like peelings

■ **Stiff** — Bristles are shorter and thicker; perfect for scrubbing and for wet use with cleaning chemicals

■ **Soft/stiff combo** — The best of both worlds, offering stiff bristles that loosen stubborn dirt and soft bristles that sweep away fine particles

■ **Soft/split** — Soft bristles with split ends; these hold more water and cleaning chemicals to achieve a maximum washing effect

Bristle type

Waterfed

Ultra Safe Technology

Broom options

■ **Sweeping brooms** — Designed to clean in environments where hygiene and efficiency are essential; available in a variety of bristle options to accommodate different soils, floors, and spaces

■ **Deck scrubs** — Designed to remove stubborn or sticky particles from floors; available in waterfed

■ **Specialty scrub brushes** — Designed to remove stubborn or sticky particles from a variety of surfaces such as walls, floors, and even grout; waterfed options are available

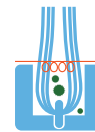

■ **Tank brushes** — Clean curved surfaces easily and efficiently with the broad and angled bristle arrangement of a tank brush

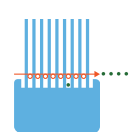

Staple-set vs. UST

UST's unique hygienic design, bristle security units, and one-piece construction make these brushes ideal for use in high-sensitive environments.

Specialty scrub brushes

- The right level of clean needs the right tool, and our specialty scrub brushes get the job done with distinct bristle patterns, stiffnesses, and angles.
- The Grout Brush (7040x) has an arrow-shaped bristle pattern designed to efficiently clean the natural cracks, crevices, and grout lines of tiled surfaces.
- The angled bristles on the High-Low Brush (7047x) were designed to clean the area where the wall meets the floor, as well as in exposed drains and gulleys.
- The Waterfed Washing Brush w/Angle-Adjustment (7067x) can be used as a dusting brush or a wall/machine washing brush. Its waterfed design is excellent for rinsing after foaming.
- Tank brushes (7037x and 7039x) have a unique 180-degree bristle pattern for cleaning curved surfaces efficiently and effectively.

Sweeping brooms

- Angled bristles make the Angle Broom (2914x) ideal for sweeping narrow spaces and collecting larger debris before further cleaning or sanitizing.
- Vikan Push Brooms (2915x, 2920x) work well for large areas and heavy debris. The thick bristle pattern is strong enough for large messes and dense enough for small debris.
- The angled design and split bristles of this broom (2916x) make it excellent for sweeping small or fine debris.
- Often used as lobby brooms, Vikan Upright Brooms (3104x and 3166x) are well-suited for sweeping narrow spaces and areas between production lines.
- The Fine Particle Push Broom (3178x) is designed for dry environments, making it great for sweeping fine particles such as flour, starch, sugar, and other dry powders. It also excels at collecting dust and fine dirt.
- UST Push Brooms (3171x and 3173x) maximize cleaning while minimizing potential contaminants. Bristle security units are organized to form a unique bristle pattern that provides improved efficiency and simplifies tool cleaning and inspection.
- Combo Push Brooms (3174x, 3194x) are versatile, suitable for both wet and dry sweeping. The stiff front bristles loosen heavier debris, while the soft rear bristles gather finer particles, making them popular in kitchens and restaurants.
- The Small Particle Push Brooms (3179x and 3199x) are great at sweeping fine debris in dry environments.
- 3194x and 3199x feature a 24" wide broom head that is ideal for efficiently cleaning large areas.
- 3175x and 3195x have more densely packed stiff and soft bristles to sweep both fine and larger debris, and were designed with feedback from US food and beverage manufacturers.

Deck scrubs

- Deck scrubs are designed to work with water and cleaning chemicals to scrub tough and stubborn messes.
- Waterfed Deck Scrubs (7041x and 7043x) allow a steady stream of water to move through the tool for better cleaning power during scrubbing.
- The Compact Deck Scrub (7042x) has angled bristles around its perimeter and a rounded, compact design for improved durability. This scrub is used to clean around equipment and against walls.
- Stiff bristles on the 12" Deck Scrub (7060x) and 19" Deck Scrub (7062x) provide a deep clean that removes tough debris on all types of floors, including epoxy, tiles, cement, etc.
- The unique construction and pattern of the bristle security units makes the UST Deck Scrub (7064x) effective at scrubbing stubborn debris on both textured and smooth surfaces, particularly in high risk areas where hygiene is critical.

Vikan products are designed to work exclusively with Vikan handles:

- Vikan products employ a hygienic proprietary thread that is suitable for use in food contact areas.
- Vikan hygienic threads are not compatible with products that use another thread type.
- Vikan handles can be interchanged with all other Vikan products such as scrapers, brooms, scrubs, squeegees, tube brushes, and pad holders.

For more information about Vikan handles, email cs@vikan.com or call (317) 876-9856
