Product selection guide

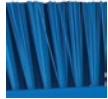

Vikan hand brushes

Bristle options

- **Soft** — Bristles are longer and thinner than other types; ideal for sweeping dry, fine particles like flour and sugar

- **Medium** — Suitable for wet and dry applications; great for sweeping larger food particles like peelings

- **Stiff** — Bristles are shorter and thicker; perfect for scrubbing and for wet use with cleaning agents

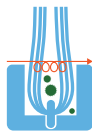

- **Soft/Split** — Soft bristles with split ends; these hold more water and cleaning chemicals to achieve a maximum washing effect

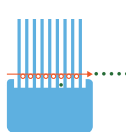

Staple-set vs. UST

UST's unique hygienic design, bristle security units, and one-piece construction make these brushes ideal for use in high-sensitive environments.

- Indicates waterflow and turbulence
- Indicates debris

UST brushware

Block options

- **Bench/countertop** — Narrow block with soft or medium bristles that is used for sweeping and cleaning counter and benchtops

- **Hand/scrub** — Ergonomic hand grips allow for tough scrubbing without hand fatigue

- **Long-handled** — Ergonomic long handle helps get into hard to reach spaces; can be held by the brush head like a scrub brush when more force is needed

- **Short-handled** — Ergonomic grip prevents hand fatigue and the large brush head easily scrubs and washes tough messes; can be used by holding the short handle or by gripping the brush head

- **Dish** — Ergonomically designed handle with an angled grip that makes dish washing easier and more effective

- **Utility/Misc.** — These brushes allow for specialized cleaning in areas where there is a need

Vikan

Scrubbing hand brushes

FDA

- Scrub brushes deliver effective cleaning by applying pressure directly to the brush block, making them ideal for cleaning surfaces within arm's reach. These brushes are widely used for scrubbing tables, conveyor belts, chopping boards, buckets, and large bowls. The angled bristles can reach into tight corners and hard-to-access spaces.
- The UST Hand Brush features flared bristles designed to reach deep into crevices and other challenging spots. Its large-block design provides a secure grip, allowing for greater control and an ergonomic grip.
- Compact yet highly effective, the nail brush is perfect for cleaning hands, arms, and even small tabletops. Reliable and easy to use, this brush is an essential addition to any cleaning kit.

Bench brushes

- The narrow bench brush's slim design makes it a versatile tool for tackling hard-to-reach areas effectively, such as where the conveyor belt meets their sides or along the rubber seals of refrigerators. Its.
- Designed for high-risk environments where hygiene is crucial, UST bench brushes prioritize cleanliness and durability, making them a trusted choice in sanitary-sensitive industries.
- Perfect for larger surfaces, the counter brush efficiently dusts or sweeps dry, fine particles from tables and equipment. Its wide coverage area ensures quick and effective cleaning.
- Versatile in function, bench brushes can double as a dustpan brush and a variety bristle types can accommodate different particle types (fine, large, damp, dry). They may also be used as a dust pan brush.

Short-handled hand brushes

- The UST short-handled hand brush is expertly designed for cleaning machinery, conveyor belts, production lines, and food preparation surfaces, particularly in high-risk environments where hygiene is paramount. Its innovative bristle arrangement, featuring angled Bristle Security Units, ensures thorough and efficient cleaning.
- Our short-handled hand brushes come in three bristle types, making them suitable for a wide range of surfaces, including equipment, tables, and walls. The soft and soft/split brushes are best suited for washing delicate materials like glass, stainless steel, or Plexiglas, since it won't scratch their surfaces. For tougher cleaning tasks, the stiff bristle brush is designed to tackle stubborn debris on less sensitive surfaces with ease.

Long-handled hand brushes

- The utility brush features an ergonomically raised handle to reduce strain and the risk of injury. It is suitable for cleaning small surface areas such as tables, pots, cutting boards, and more.
- Designed for tasks requiring extra reach, long-handled hand brushes make it easy to clean inside machines, deep buckets, containers, or other hard-to-reach areas.
- The UST long-handled hand brush is specifically designed for cleaning machines, buckets, containers, and tubs in high-risk environments.
- Dish brushes have angled handles and bristles along with scraping edges for efficiently cleaning dishes and small areas on equipment.
