Vikan squeegees

Blade options

- **Single Blade Ultra Hygiene** — Seamless and crack-free design eliminates bacteria hiding spots, ensuring top-level hygiene. Its smooth, rounded surfaces and elongated ends protect the FDA-compliant rubber blade and prevent splashes.

- **Double Blade Ultra Hygiene** - Equipped with two flexible, non-porous FDA-compliant rubber blades, this squeegee efficiently cleans larger areas. Replaceable blade cassettes are designed for moving liquids and debris on surfaces in food production facilities.

- **Double Blade Foam Rubber** — The foam rubber blades make this squeegee the most effective at moving large amounts of liquid on smooth and tiled surfaces. The soft rubber easily reaches into tight spaces like grout lines.

- **Ceiling Squeegee** — Designed with drain holes, this squeegee efficiently clears condensation from ceilings and pipes, preventing moisture from dripping into food products or onto expensive machinery.

Ultra Hygiene single blade

- Ultra Hygiene single blade squeegees feature a soft rubber lip that ensures efficient cleaning. The rubber lip is angled to facilitate cleaning close to walls and around equipment. The squeegee's splash guard prevents the liquid from splashing onto the dried surface.
- The Ultra Hygiene Bench Squeegee is a fully molded single-blade squeegee with a soft and flexible blade that is easy to keep clean. This squeegee is ideal for removing excess water and food debris from food preparation surfaces.
- Ultra Hygiene squeegees utilize a hygienic proprietary thread that allows for pairing with any Vikan brand handle.
